## 1.0 INTRODUCTION

In accordance with RCRA policy, hazardous waste transporters, generators, or treatment/storage/disposal (TSD) facilities are subject to Compliance Evaluation Inspections (CEIs) which address facility environmental concerns. The inspections are conducted to evaluate compliance with all applicable standards promulgated under 40 CFR Parts 262 through 268.

Under TES V Work Assignment R02035, CDM Federal Programs Corporation (CDM Federal) was contracted to conduct a CEI at the Continental Electric Company facility in Newark, New Jersey. Mark Greany of CDM Federal visited Continental Electric Company on November 1, 1993 to conduct the CEI. The information contained within this report was obtained from facility personnel and onsite records during the CEI, except where referenced otherwise.

The CEI was conducted using (as appropriate) the New Jersey Generator Inspection Report, General Site Inspection Form, Waste Minimization Checklist, Transporters Standards Checklist, Hazardous Waste Tank System Inspection Checklist, and the RCRA Land Disposal Restrictions Checklist. These documents were used as the basis for the inspection. All pertinent information is recorded in the inspection narrative. When necessary, relevant checklists were completed to provide additional detail when specific concerns were encountered during the inspection.

## 4.0 CONCLUSIONS

The Continental Electric Company facility located at 325 Ferry Street, Newark, New Jersey was closed at the time of this inspection. The facility appears to be permanently closed. Steel gates were locked over all doors and the facility appears to be vacant. Maria Rocha, an employee at the Capital Travel Agency adjacent to Continental Electric, stated that the facility has been closed for approximately one year.
